

# Bunting

**Bunting is a great way to add some fun and colour to your E-Tea decorations! We have A4 bunting as well as small bunting depending on your decorating preferences, you can print many or just a few!**

## **Instructions:**

Use a colour printer to print out the pages of the designs that you like. You might want to print one of each design, or just a few. You can print them on paper or cardboard.

If you are decorating a large area you may need to print more copies.

Cut along the edges of each printed triangle and discard the white excess paper/cardboard.

Once you have cut all your triangles you need to decide how you want to put them up - we've got two options below you can choose from!

## **Stick it up:**

The simplest option is to simply stick the triangles up onto a window or a wall.

You can use sticky tape or blu tac on the back of each triangle to create any design you like!

## **String it together:**

Use a holepunch to punch a hole in both top corners of each triangle. Then take your ribbon or twine and feed it through the first hole of the triangle from the front, then back through the second hole of the triangle from the back.

Continue this until you have strung all the triangles together.
