

Bunting

Bunting is a great way to add some fun and colour to your E-Tea decorations! We have A4 bunting as well as small bunting depending on your decorating preferences, you can print many or just a few!

Instructions:

Use a colour printer to print out the pages of the designs that you like. You might want to print one of each design, or just a few. You can print them on paper or cardboard.

If you are decorating a large area you may need to print more copies.

Cut along the edges of each printed diamond on the page (4 per page) and discard the white excess paper/cardboard.

Once you have cut all your diamonds, fold each across the middle to form a triangle.

To string the bunting together you will need some ribbon or twine.

Place each diamond over your ribbon or twine so that one of the triangles sits on either side. Then secure the paper or cardboard triangles together using double sided tape or staples. This will attach them to the ribbon or twine.

Continue this process until you have strung together all the diamonds.

Then you're ready to hang it in place!
